United States & Australia

Market Opportunity

Globally, the number of adults living with one or more chronic illnesses exceeded 2.25 billion, a figure expected to rise.

In the United States alone, over 60% of adults grapple with chronic medical conditions, contributing to an annual healthcare expenditure surpassing US\$3.69 trillion. Meanwhile, in Australia, 46% of the population now faces chronic illnesses, with numbers steadily climbing.

At every life stage, health and welfare concerns present unique challenges. To address these challenges, many individuals are turning to wearable technology, leveraging its capabilities to manage chronic conditions more effectively.

The wearable medical alert device market is poised for significant growth, projected to expand at an annual rate of 8.3% and reach a value of US\$10 billion by 2025. By 2030, this market is anticipated to double, soaring to over US\$20 billion.

This growth reflects a burgeoning demand for innovative solutions that enhance healthcare management and ensure peace of mind for users worldwide.

Costs  Global spending on health continues to increase each year

1.3b+ Persons living with a disability and mental health condition

2.25b+ Persons living with at least one chronic illness

US\$10b Medical Alert Device market capitalisation

Our Story

Who we are

We are designing, developing and pioneering the next generation of smart, stylish and connected wearable medical alert wristbands that when paired with our cloud-based secure platforms provides independence from constraints commonly experienced by sufferers of chronic illness & disabilities.

We know someone who lives each day with a chronic medical condition, such as heart disease, cancer, chronic lung disease, diabetes, Alzheimer's or allergies.

We understand that these medical conditions often impact the quality of life and are generally rarely cured completely.

The personal impact for both children and adults living with a chronic illness & disabilities can be demanding and place extra stress on a person's physical, emotional, and mental health.

What is strongly recommended by health experts for those with medical conditions, special needs and those unable to speak for themselves is to "wear a medical alert device".

“Being a parent of a child living with a disability, I approached the foundation of ezybandz to meet a lived experience. One that would allow my child to gain additional independence as she grows and grant me peace of mind.”

Tony Martelli
Co-founder &
CEO

Why Ezybandz?

Next Generation Technology

Provides first responders medical information in emergencies via QR scan

Offers independence & peace of mind with Geolocation & Geofencing

Alert your emergency contacts with Fall Detection technology

Replace public transport cards with an NFC tap 'n ride feature

Eliminates the need for lanyards, swipe-cards, or keyring fobs

Safety with a wearer activated distress/SOS button

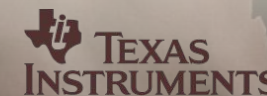

SoftSIM vs Physical/eSIM

The Ezybandz GuardianOne uses SoftSIM, providing seamless global connectivity by dynamically switching between networks.

- Uninterrupted coverage
- No physical components
- Simplified the user experience

This technology choice ensures our devices are a more flexible and scalable solution for global expansion.

POWERED BY

Bandz & Platforms

Introducing the 'GuardianOne'

Introducing the ezybandz GuardianOne; the next-gen smart, stylish and connected wearable medical alert wristbands.

Paired with our secure, cloud-based platforms, provides independence from constraints commonly experienced by sufferers of chronic illness and disabilities.

*Launching with EzyHealth & EzyFind. Remaining platforms launching in line with the future platforms roadmap.

Capability Platforms

 **EzyHealth**

Comprehensive digital health care coverage with wearer Medical Information via QR Code.

Recommended Use:

- Aged Care
- Home Care
- Disability Management
- Chronic Illness

 **EzyFind**

GeoLocation & GeoFencing with Fall Detection and SOS alert button. Includes pedometer feature.

Recommended use:

- Wandering monitor
- Personal Emergency Response
- Independent Living
- Camping & Outdoors

 **EzyFare***

NFC enabled Tap'n Ride public transport travel functionality.

Recommended use:

- Public transport users

 **EzyAccess***

Secure convenience of NFC access by replaces lanyards, swipe-cards & keyring fobs for access control.

Recommended use:

- Office workers
- Gym users
- Medical professionals
- Festivals & events

Key Features

Fall Detection

Instant alerts for detected falls ensure your safety.

Medical Information via QR Code

First responders access comprehensive digital health information.

SOS Button

Immediate assistance at your fingertips during emergencies.

Live GPS Tracking

Real-time location tracking for peace of mind.

SoftSIM/eSIM Included

SoftSIM technology, eliminates the need for a physical SIM card.

International Coverage

Stay connected worldwide with our international LTE-M IoT coverage.

Historical Tracking

Review past movements with ease using reporting features

Geofencing

Set boundaries and receive alerts with our geofencing feature.

Standalone Connectivity

Our wristbands do not require pairing with a mobile phone.

Web Dashboard & Mobile App

Update your details and wristband functions effortlessly.

Pedometer

Track daily steps and maintain an active lifestyle

Versatile Wearability

Comfortable materials, weather resistant, shower & swim

Immediate help for falls or health emergencies

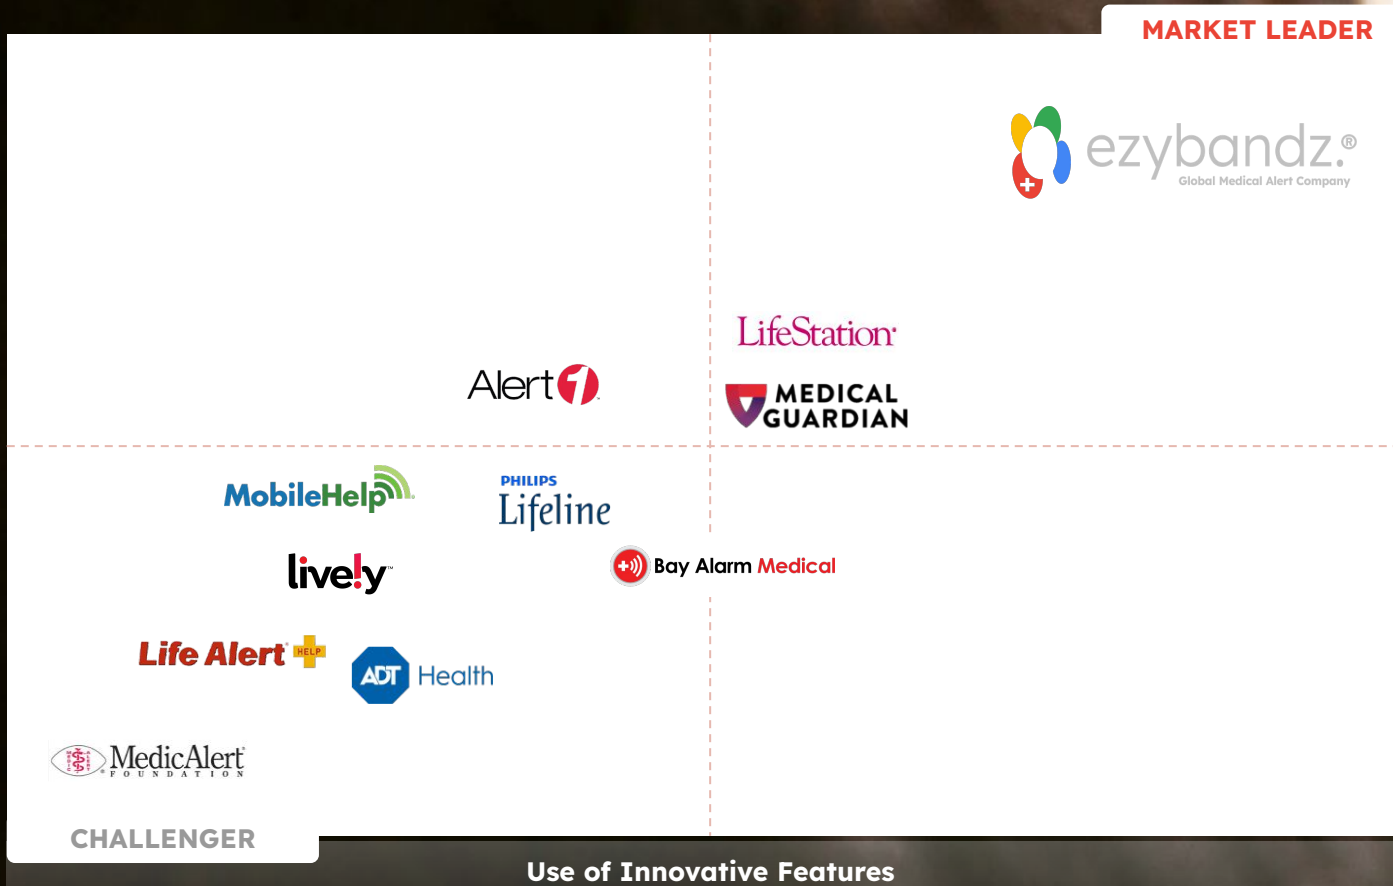

Stay connected to emergency services and healthcare providers, anytime, anywhere.

Update personal medical info and SOS alerts recipients yourself anytime 24/7.

Competitors

How do we compare?

Reliance on Legacy Technology

The Ezybandz Advantage

- **Zero-Config Global Coverage**
 - The only device that uses SoftSIM meaning instant global connectivity
- **Tetherless = No Phone Required**
 - Peace of mind coverage without a second device
- **In Case of Emergency QR**
 - Life-saving first responder information immediately available via QR Scan
- **Purpose Built/Single Focus**
 - Custom designed. We do not import or repurpose existing products

Compliance & Validation

Committed to long-term success

We believe that our commitment to compliance and validation is essential to our long-term success. We are committed to providing our users with safe, effective, and compliant products and services.

Class 9 Registered Trademark

A registered trademark gives Ezybandz the exclusive right to use its trademark in connection with the goods and services listed in its trademark registration. This helps to protect the Ezybandz brand from unauthorized use and competition.

Design Patent (Registered)

Our design patent can help Ezybandz to differentiate its product from the competition and prevent others from copying its design. This means that Ezybandz has the exclusive right to make, use, or sell its product with the patented design.

Registered NDIS Provider

The National Disability Insurance Scheme (NDIS) is a government-funded scheme that provides support to people with disabilities. As a registered NDIS provider, Ezybandz is able to offer its products and services to NDIS participants. This gives Ezybandz access to a large and growing market.

Partnerships with Award winning developers

Ezybandz collaborates with global industry experts and award-winning developers through its in-house research and development team to integrate & innovate IoT and operational technologies into its products and platforms.

Government Research Funding

Government research funding provides Ezybandz with a profile and the financial resources to develop and commercialize its products and services.

Provider Benefits

Get onboard now!

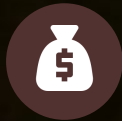

Modernise your medical assistance Device/Health Tech

With the Ezybandz GuardianOne, say goodbye to outdated pendants and hello to advanced technology tailored to your requirements

Enhanced Connectivity

Unlike disconnected devices that provide limited value, Ezybandz GuardianOne ensures continuous monitoring and real-time assistance.

Reduced Client Management Costs

By integrating GuardianOne into your services, you can streamline operations and enhance efficiency, reducing client management costs while delivering high-quality, responsive care to your clients.

Brand Reputation & Risk Management

Reduce the risk of emergency incidents for your clients AND safeguard your business's reputation as a trusted provider of modern, reliable care solutions.

Boost Client Satisfaction & Retention

Offering GuardianOne helps boost client satisfaction and retention by providing a reliable, cutting-edge solution that enhances safety and independence, strengthening trust in your services.

Make a difference to your clients.

Partner with Ezybandz. Your wearable technology partner for Care Transformation.

Thank you.
