# ► FABRICATING SOLUTIONS FOR CHALLENGING PROJECTS

**Western Metalworx provide world-class metal fabrication services to the mining, industrial and commercial sectors.**

A privately owned Australian company, our fabrication solutions are respected for their innovative design and safety compliance. From on-demand supply through to major projects, we have the capacity and skillset to deliver, no matter your challenge.

Since our formation we've shown leadership in vision and design, creating fabrication solutions for large scale resource projects, and bespoke product development to meet challenging client applications. Through our onsite consultation and technical understanding of industry requirements, we are accustomed to solving complex engineering challenges.

Our reputation is based on a commitment to design, manufacture and repair products according to precise specifications and strict quality controls. We are familiar with the harsh operating environments where our products are utilised and for more than a decade have been a trusted supplier of fabricated metal products to the mining, industrial and commercial sectors.

Our products come with a guarantee of performance, and are delivered with exceptional service to ensure speed to market, seamless project management and client satisfaction.

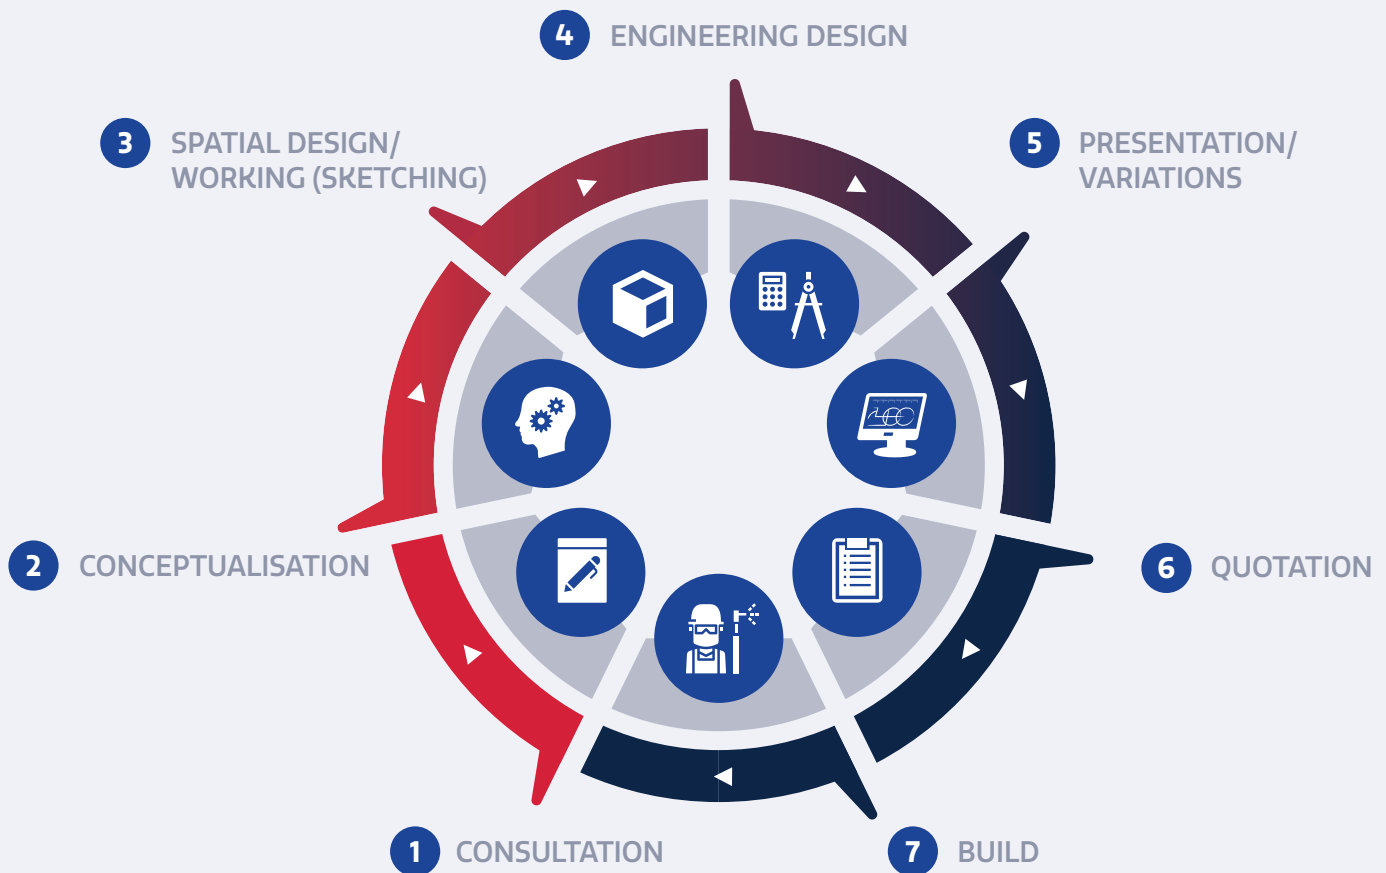

## ► ENGINEERING YOUR VISION

We are fabrication specialists, constructing highly specialised purpose-built customer projects.

We build long-standing client relationships through collaboration and design, transforming a vision into a project reality. We challenge traditional thinking and continually innovate to create solutions for our client's project engineering challenges.

We have the capacity and expertise to deliver a quality range of fabricated components allowing us to deliver innovative customised products and components.

Our fit for purpose metal fabrication facility is located in Malaga and operated by a team of experienced tradespeople with skills in boiler making, sheet metal fabrication, vehicle body building, engineering design and specialist welding. We strive to consistently exceed client expectations by investing in the latest applications and technologies necessary to deliver globally competitive products.

# WORKING WITH US

Our customers benefit from our insightfulness, technical ability, risk management practices and experience in specialist fabrication. We create certainty through the technological support of Solid Works 3D for both our fabricators and clients.

We manufacture locally, creating flexibility in our fabrication methodologies that continually provide smarter approaches, reduce build durations and

add greater value throughout the life of the projects we undertake. Our solutions are situation-specific, pragmatic, and designed and delivered to exceed our clients expectations.

Each project is a unique opportunity to prove our capability and showcase our attention to systems, processes, quality and resources management.

## ► OUR VALUES

Our Guiding Principles

**WE ARE  
INNOVATIVE**

**WE ACT WITH  
INTEGRITY**

**WE DELIVER  
ON-TIME, SAFELY**

**WE GUARANTEE  
QUALITY  
CRAFTSMANSHIP**

## ▶ OUR COMMITMENT TO PEOPLE AND COMMUNITY

Committed to acting ethically and upholding the highest standards of professionalism, we highly value diversity and recognise and embrace our people's individual contribution within our team.

Integrity, teamwork and honest open communication are our guiding principles that provide the framework within which we conduct our relationships.

### Indigenous Engagement

We are conducting relations with other Traditional Landowners and people of the land throughout Western Australia to provide opportunities to indigenous people. This has extended to the employment of Aboriginal apprentices to learn the skills and gain the trade of a Steel Fabricator. Through this process, we have engaged traditional landowners from the Banyjima and Eastern Gurama tribes, local language groups from the inlands of the Pilbara, and Charles Smith from Yurala Aboriginal Contracting Services.
